

Space Respector

Space Respector

**helps people to be mindful of
others' personal space and stay
out of their space bubbles.**

Social Detective

helps you observe
the distance people
stand apart from each
other based on the
situation and the
people in the situation

When you are not planning on talking to someone
Social Detective notices that they usually stand at
least  from each other.

When you are planning on talking to someone Social Detective notices that they usually stand at least

from each other.

No worries...

Brakester will help you know when you are standing the expected distance from someone based on the situation and your plan for talking to them.

People self-monitor how far away they should stand from someone.

When they do this, they use their space bubble locator in their brain.

Personal Space Etiquette

**Remember everyone likes to have their
space bubble around them respected.**
